
COMPUTER SCIENCE INVESTIGATORY PROJECT

**KENDRIYA VIDYALAYA
SECTOR-24, NOIDA**

SESSION 2019-2020

ISHAN SINGH

Certificate of Excellence

This is to certify that this project is done
by Mr. _____ Of class _____
during the academic year 2019-2020.

Date _____

Kendriya Vidyalaya
Sector-24, Noida

Submitted for ALL INDIA SENIOR
SECONDARY EXAMINATION held in

Examiner

DATE _____

ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my teacher MRS.

Reetu Randev, who has been the primary source of guidance in this project, as well as our principal MR. M.K. Garg who gave me the golden opportunity to do this wonderful project. Which also helped me in doing a lot of Research and I came to know about so many new things I am really thankful to them .

Secondly I would also like to thank my parents and friends a lot in finalizing this project and for their valuable ideas and suggestion that helped to complete this project.

LIFESPARK BANK

Our project, LifesparkBank aims to provide a unique, easy to access , easy to operate, cost effective but sturdy methodology of banking system to its users.

LifesparkBank is developed using Python language with the help of tkinter library of python, which with the help of its powerful GUI provides its users a very user friendly UI. Many special methods of tkinter library has been extensively utilised in our project.

To manage the large number of data and information, LifesparkBank takes the help of Mysql database which provides it with seamless and smooth formation, manupilation and control of large amount of records and data. This has been possible by using mysql connector from python which enables us to write and operate query on Python UI and execute it on Mysql

thus providing us with front end i.e, python where all commands are given and back end, i.e. Mysql , where are the execution of data takes place.

LifesparkBank provides its user with many functionality like:

- **Registration** - This function takes credential from users as input and then registers them with lifesparkBank by opening their accounts with us.
- **Login** - It gives the users accessibility to their accounts by logging them into their accounts securely with is done with the sytem of name , account number, and user chosen password, thus making lifesparkBank more secure.
- **deposit** - It enables the users to deposit their money into their accounts
- **withdraw** - It enables the user to withdraw their money into their withdraw.
- **transfer** - it gives the users opportunity to directly take money from their accounts and deposit it into another persons account by giving their name and account number only

The combination of all these functions , combined with the accessibility of LifesparkBank provides its users the best platform to operate and manage their assets. It is also an ideal platform for small retailers from rural areas,which are the target audiences.The functionality of LifesparkBank also helps us to move towards a more cashless economy thus providing more transperency in the whole system.
